The Best Way to Grow Bulbs Indoors

Plant Hyacinths in sandy soil, or make the soil porous with leaf mold secured from the woods. Plant the bulb bottom down, and push the bulb tight in the soil so that the top of the bulb is even with top of soil. Use old four or five-inch pots—never new pots if you can avoid it. There are shallow, wide pots, made to hold three or more bulbs; they are satisfactory to plant in where only one variety is planted in a pot. Never feed the bulbs with manure—the power to flower is in the bulb. A Hyacinth grown in water alone proves the truth of this. Give a good soaking after planting, and water once or twice a week if necessary during the time the bulb makes roots. Put the pots after planting—which should be done during September or October—in the ground, and cover the pot and all to the depth of three or four inches with soil. This is to prevent the roots from lifting the bulbs out of the pot. Or you can put them in the cellar where it is cool and dark. The idea is to have the bulbs kept cool and dark, so that the roots will start before the tops do. Cover up the ones outside with leaves or sawdust to the depth of six inches, as frost, if it reaches them, almost always results in injury to the flowers. After four weeks or so

examine the roots, and see if they are down to the bottom of the pot; then bring the ones you want to flower early into a dark place where the temperature is from fifty to seventy, but keep them dark by covering them up or placing them in a dark cupboard. They can be left outdoors or in the cellar if you do not want them so early, until the sprout is as long as a man's finger. This brings them in later, but is the surest way to get fine flowers, as it is more natural than to force them quickly. When the sprouts have reached the length of a man's finger they may then be exposed to the light. If brought to the light sooner the result will be that the top bells will open first, and then the flower is spoiled, for the top bells will be faded before the lower bells open. The sprouts are yellow by keeping them covered, but that does not matter, as they turn green quickly when brought to the light.

Tulips and Narcissus are treated the same as Hyacinths, except that when brought in from outdoors or the cellar they can be placed in the full light at once. Instead of pots you can use grape baskets.

Choice Collection of FANCY HYACINTHS

In this collection we place all the high-priced varieties. There is such a demand for them in Europe, where they are well acquainted with the good sorts, that the demand exceeds the supply, and they are always scarce and hard to get. When you have the following twelve Hyacinths in your possession, you have the very best that money can buy. They are every one gems of the first water.

PRICE—20c each, or set of 12 for \$2.00. Any 6 \$1.10.

In ordering, say "Fancy" Collection of Hyacinths. They are the largest, the most delicately colored and the most fragrant of all Hyacinths.

BIRD OF PARADISE—The spike is the largest of all yellow Hyacinths. The color is a rich deep golden-yellow. Very pure. No other yellow Hyacinth approaches it in either color or size.

GRAND MAITRE, "Good Master"—Deep porcelain-blue; one of the grandest of all blue Hyacinths. Much prized in Holland.

It does not conflict with any of the other blues in this collection, being entirely distinct, a delicate porcelain-blue, a color that is extremely rare in flowers of any kind. Extra fine.

MINNIE, "Mimi"—A lovely shade of blush-white. This is one of the new varieties and takes rank in Holland among the ten best varieties. It sometimes comes with a very delicate tracing of pink that sets off its charms to great advantage. Hard to beat.

Five Beautiful ROMAN HYACINTHS

We wish to call special attention to these beautiful Roman Hyacinths, which are so valuable for early winter blooming. They are among the few flowers which can be had as early as Christmas and New Years. Each bulb throws up several spikes of flowers, which are very beautiful and fragrant, and when kept in a cool room will keep perfectly for weeks. Three can be planted in a four or five-inch pot, and will soon be in flower. In the garden they are the first of all Hyacinths to bloom. We offer extra large bulbs. The new double ones are exceedingly fine. Do not fail to plant a good lot of them for winter.

CANARY YELLOW—Few Novelties have come out recently which will in importance surpass this new yellow Roman Hyacinth. There is nothing

to be said of it except it is like the common Roman white, except in color, which is a lovely shade of light yellow. 6 cents each; five for 25 cents; eleven for 50 cents.

The exact shades cannot be given, but the general outline of colors are kept separate, so that in ordering you know what color you are buying.

Early Double Flowering Tulips

These Tulips have massive flowers of brilliant and varied colors, shades and markings, and being double, the flowers last much longer in bloom than single varieties and in consequence when singles and doubles are planted in conjunction the "time of the Tulips" is greatly prolonged. Double Tulips are beautifully adapted for beds on the lawn, in the garden, and for mingling in clumps of half a dozen or more around the edge of shrubbery. They are robust growers and exceedingly effective. The early sorts do splendidly when grown in pots for winter blooming, but must be forced much slower than Single Early Tulips, by keeping them cooler. Price, 3 cents each, or the set of 24 distinct kinds of Double Early Tulips for 65 cents. Those preceded with a star are the best varieties for forcing indoors.

ALBA MAXIMA—Creamy-white; a very desirable variety.

ROSE BLANCHE—Pure white. Splendid bedder.

***ROSINE**—A beautiful, rich, clear pink. Fine forcer.

Early Flowering Single Tulips

Those marked with a Star are the best for forcing in the house, but all Tulips are fine for garden culture.

Tulips are such universal favorites that it is scarcely necessary to expatiate upon their merits here. Their ease of culture, combined with beauty of form and gorgeous coloring, render them the most popular bulbs grown for spring bedding, and for winter flowering in the greenhouse and window garden they are incomparable. The Tulip is extremely hardy and of easy culture, flowering as freely in the shade as in the sunshine and producing as fine flowers in a confined town garden as in a more favored place. Double and Single Tulips, when associated together and planted in front of shrubs, maintain a longer display than if either are separately planted. In gardens where the flower beds must be kept gay from the earliest day of spring, plant between the lines of Tulips, Scilla Sibirica, Chionodoxa Lucillae, Snowdrops or Crocus, and as these flower first they can be removed or cut down when the Tulip is coming into bloom. The Single Tulip has a greater variety of rich, delicate and attractive colors than any other selection of spring flowering bulbs. The Single Tulip is extensively grown for indoor decorations, three or five bulbs in a pot.

Price, 4 cents each; any Thirteen for 50 cents; the Set of Forty-Two distinct varieties of Early Single Tulips for \$1.40.

Miss Ella V. Baines:—Just two years ago, noticing an advertisement in the "Household Journal" and an article on Rose culture, by Miss Jessie Good, in which I was very much interested, I gave you an order for a specially advertised selection of twelve Roses for \$1.00.

I knew that you advocated the planting of small stock, nevertheless I was surprised when the package reached me, and I found it to be only eight inches long and one and a half inches in diameter, for the whole twelve plants. Nevertheless, I was not discouraged or dissatisfied, but planted them according to directions, and within two months they were a wonder. They bloomed that same spring, and all through the summer and fall. Before winter none of the bushes were less than eighteen inches high; some much larger.

Chinese Sacred or Oriental Narcissus.

A VARIETY OF POLYANTHUS NARCISSUS.

The "Shui Sin Far," or Water Fairy Flower, Joss Flower, or Flower of the Gods, etc., as it is called by the Celestials, is a variety of Narcissus, bearing

Chinese Sacred Lily (Narcissus Orientalis).

in lavish profusion chaste flowers of silvery-white with golden-yellow cups. They are of exquisite beauty and entrancing perfume. It is grown by the Chinese according to their ancient custom to herald the advent of their new year and as a symbol of good luck. The bulbs are grown by a method known only to themselves, whereby they attain great size and vitality, insuring luxurious growth and immense spikes of flowers. In fact, the incredibly short time required to bring the bulbs into bloom (four to six weeks after planting) is one of the wonders of nature. "You can almost see them grow," succeeding almost everywhere with everybody. They do well in pots of earth, but are more novel and beautiful grown in shallow bowls of water, with enough fancy pebbles to prevent them from toppling over when in bloom. A dozen bulbs started at intervals will give a succession of flowers throughout the winter. We are importing direct from China immense bulbs of the true large-flowering variety. Price, 20c each.

Giant Golden Sacred Lily.

(Jonquil Campernelle Regulosus)

The flowers of this beautiful Sacred Lily are almost identical with the Chinese variety, except that they are of the most lovely shade of deep golden-yellow, making a fine contrast with the white bloom of that noted kind. The bulbs are not nearly so large, but the trusses of flowers are of good size, making this a charming bulb for house culture. Grows in water, like the old variety. Price, 3 cents each, six for 15 cents, 25 cents per dozen.

TRY A DOZEN AND BE DELIGHTED

For Fall Planting

"The fairest of all things that blossom and grow,
Sweet as the summer and pure as the snow,
Is the Lily that tells,
Like the glad Easter Bells,
Once more the sweet story which all hearts should
know."

Lilium Giganteum

The True Bermuda Easter Lily.

This peerless Lily is the greatest acquisition to floriculture made in many years. Their profusion of bloom, the remarkably short time required to bring them into flower, and the certainty to produce abundant bloom, and also the ease with which they can be manipulated to be flowered at any desired period, such as Christmas, Easter, and other special occasions, make them invaluable. Flowers are delightfully fragrant, pure waxy white, of great substance, and if cut as soon as they are open or partially open they can be kept for two weeks. A short time only is required to bring them into bloom. Bulbs potted in August can be had in flower in November if desired. A succession of bloom can be kept up from November to May by bringing the pots of rooted bulbs in from cold frames at intervals during the winter. The quantity of bloom produced is marvelous. Blooming plants in pots form typical Easter offerings and presents, for decoration of window, table, house or church. As a garden Lily it is of great beauty, being entirely hardy except in Northern climates, where it requires a protection of leaves or litter to the depth of five or six inches. Price, 25c each; three for 60c.

Lilium Candidum

The old-fashioned pure white garden Lily, also known as Easter Lily, or Annunciation Lily. One of the hardiest. Flowers snow-white, with heavy yellow stamens and sweetest fragrance. It bears from five to twenty blossoms. This is the most decided variety we have in expressing its preference for a planting time. It must be planted in the early autumn to succeed well, as it makes its leaf growth at once after planting, and prepares itself for early flowering. The bulbs are sometimes kept in cold storage for spring sales, but never do quite so well. Customers will do well to plant a bed of twenty-five or more for a permanent bed or border. Price, 25 cents each; three bulbs for 60 cents; \$2.00 per dozen.

Lily of the Valley (Convallaria).

Lilium Auratum (Gold Banded Lily).

Lilium Auratum

The Gold-Banded Lily of Japan.

This is the highest type of flowering bulbous plants. The most beautiful and fragrant of all our list. The flowers are of immense size, being fully twice as large as those of almost any other Lily. The new bulbs are brought from Japan for us each year, and only such will give best results. They are shipped to us wrapped in a ball of clay, and arrive plump and sound, every one ready to bloom. Fine bulbs, 30 cents each; three for 75 cents.

TIGRINUM SIMPLEX

The single Tiger Lily, imported. This is a great favorite. There is no better Lily grown. Price, 25 cents each; three for 60 cents.

TIGRINUM FLORE-PLENO

Bright orange, spotted black and very double. Price, 25 cents each; three for 60 cents.

LANCIFOLIUM RUBRUM

A beautiful bright rose, spotted with a rich velvety crimson. Price, 25 cents each; three for 60c.

LANCIFOLIUM ALBUM

One of the most beautiful of all Lilies. Pure white and very fragrant. Price, 25 cents each; three for 60 cents.

LILY GIGANTEUM, CANDIDUM and LILY OF THE VALLEY are now ready. The other varieties cannot be sent until November. Order now, and we will file your order, and send as soon as we receive them from abroad.

A GREAT OFFER

The set of seven lovely Lilies on this page, all distinct, costing \$1.50, sent for only \$1.50.

Lily of the Valley

The modest bell-shaped flowers, of the purest white, are highly prized for cutting purposes, and for flowering in pots in winter they are exceedingly well adapted. Beautiful and most interesting ornamental designs for the parlor or conservatory may be produced by planting Lily crowns in Crocus pots or in pyramidal pots made especially for this purpose and pierced with holes. They will last several weeks in beauty. By taking them in at intervals a succession of different designs may be kept up all winter. They are also forced in immense quantities by florists, but they are the most charming when grown in large patches in partially shaded localities around the lawn, near the borders of streams, lakes, etc., being perfectly hardy. Price, 4 cents each; 40 cents per dozen.

Winter Blooming Freesias

FREESIA REFRACTA ALBA—No description can do adequate justice to this beautiful plant. The flowers are two inches long and about the same in width, shaped like miniature Gladioli, and borne in clusters of six to ten on depressed horizontal scapes. The body of the flower is pure white, with lower segments spotted lemon-yellow. The perfume is most delicious, being a mixture of Mignonette, Violet and Jasmine, and one plant is sufficient to perfume a large room without the overbearing perfume of Hyacinths or Tuberoses. The plant has tooth-shaped bulbs and flat, spreading leaves. Its cultivation is the simplest, requiring only to be potted in October, to be watered sparingly at first, placed in a sunny window, and watered more as growth progresses. When out of flower, store in some place, and repot at proper season in fresh soil for another year's growth. Six fine selected bulbs for 20 cents; twelve for 35 cents.

Triteleia Uniflora

This is one of the choicest additions to winter-flowering bulbs that has been offered in many years. The bulbs are small, and several can be planted in a pot, each one of which will send up several flower scapes, bearing star-shaped blossoms one inch in diameter, pure white, elegantly lined with celestial blue. As the flowers follow each other successively and last a long time before fading, a pot of these bulbs is never without flowers for several months in mid-winter. They are also quite hardy, and can be planted in the open ground, where they will bloom elegantly in early spring. Fine bulbs, 15c per doz.

Triteleia Laxa

This is a new variety, bearing ten flowers to the stalk instead of one flower like the Uniflora. Elegant. Be sure to try it. 25 cents per dozen.

Ixias

The Ixias produce their beautiful flowers in spikes, and are of the most dazzling and brilliant colors, and sure to attract great attention. It is only a few years that they have been grown in this country to any great extent, but in that time, like the Freesias, they have become very popular. For pot culture in the house they give great satisfaction, being of easy culture and free bloomers. Half a dozen bulbs can be planted in a five-inch pot, and the display is magnificent. For open ground culture give them winter protection with leaves or straw. They are very cheap, and all lovers of odd and beautiful flowers should certainly add them to their collection. The sorts we offer are new and very fine. Price, 15 cents per dozen.

Scilla Sibirica, or Squill

STAR HYACINTH—Scilla Sibirica is one of the loveliest spring flowers. It has color almost as deep as the sky itself. Quite hardy, and flowers out of doors at the same time as the Snowdrop, in front of which it gives a charming effect. Planted in pots and kept indoors it may be had in bloom as early as Christmas. Its magnificent flowers make it suitable for any decoration whatever.

SCILLA SIBIRICA ALBA—Pure white.

SCILLA SIBIRICA BLUE—Bright blue.

Price, 3 cents each; 30 cents per dozen.

Scilla Campanulata

Have the largest, showiest flowers of all the Scillas.

SCILLA CAMPANULATA ALBA MAXIMA—Snow-white.

SCILLA CAMPANULATA ROSE QUEEN—Clear rose.

SCILLA CAMPANULATA SKY BLUE—Clear blue.

Price, 3 cents; 30 cents per dozen.

Crocus Vernus

THAT BLOOM IN THE SPRING.

The Crocus is one of the first flowers of spring, and one of the best for blooming in the house during the winter. Half a dozen bulbs may be planted in a pot, and will make a very pretty show. For garden culture plant bulbs two inches deep and two or three inches apart. They are so cheap and pretty they ought to be found in every garden in abundance. They bloom splendidly when planted on the lawn among the grass. They lift their bright heads up through the sod very early, and give the lawn a charming aspect. The sorts we offer are especially strong and fine. Price, 20 cents per dozen; \$1.50 per hundred.

DANDY—A light blue, bordered with white.

CLOTH OF GOLD—Pure yellow, suffused with brown.

Crocus Vernus—The First Flower of Spring.

Allium Neapolitanum

This plant has graceful leaves from eight inches to a foot long, of the darkest green, forming a very cheerful mass. Each plant bears from one to three scapes, or trusses, of flowers, which are pure white, about one-fourth of an inch in diameter. Many of the trusses bear over one hundred flowers each. Five for 10 cents; 20 cents per dozen.

Ranunculus

This class of bulbous plants is among the finest of all flowers. The French Ranunculus, especially, are distinguished by great strength, size and beauty. They attain a height of 10 to 15 inches, and the hues and colors of their many varieties, varying from pure white and yellow to bright vermilion and crimson, are really beautiful. The Persian Ranunculus are a little smaller than the French, and also more dwarf, but of the most graceful form. The Turban, or Turkish Ranunculus, differ very much from each other, and display lovely Oriental beauty of coloring. Grown easily in pots, or out of doors if protected.

DOUBLE PERSIAN RANUNCULUS—20c per dozen.
DOUBLE TURKISH RANUNCULUS—25c per dozen.
DOUBLE FRENCH RANUNCULUS—15c per dozen.

Giant Snowdrops

Beautiful dwarf white flowers, pushing up through the snow in the spring. They are lovely little blossoms, and should be found in every garden. Indoors they are equally pretty and easily brought into bloom. Being dwarf, they are usually planted along walks or margins of beds. The Giant Snowdrops we offer are much superior to the common varieties. **GIANT SINGLE SNOWDROP (Elves)**—2 cents each; 20 cents per dozen; \$1.50 per hundred.
GIANT DOUBLE SNOWDROP—40 cents per dozen; \$2.50 per hundred.

Iris, The Rainbow Flower

The Iris are fast coming into favor. They are entirely hardy and increase rapidly when planted in a flower garden. By planting the different families of Iris you will have bloom from the tenth of May till the middle of July. To get best results Iris are planted in the fall, although they can be planted any time in the spring of the year.

Iris Kaempferi—Japanese Iris

The improved forms of this beautiful perfectly hardy flower, producing a dozen flower spikes, each spike bearing from two to four enormous blossoms eight to ten inches across, are not out-rivaled by any flower in existence. They are of the most delicate and beautiful colors, markings and combinations. Coming into flower about the middle of June and continuing for a month, they fill a period when flowers of this attractive type are particularly welcome. They will thrive in almost any situation, but require plenty of water when they are forming their buds and developing their flowers. The following varieties are the cream of over one hundred sorts. Price, 20c each; six for \$1.00; the set of twelve for \$1.75. We can supply extra fine mixed sorts at \$1.00 per dozen.

Bermuda Buttercup Oxalis

An Unrivalled Winter-Flowering Pot Plant.

This is one of the finest winter-flowering plants for pot culture that we have ever seen. It is such a strong, luxuriant grower that one bulb will be sufficient for a six or eight-inch pot. Place in a dark, cool position for a few weeks to root thoroughly, and remove to a sunny situation in the window or conservatory, in a temperature of about 60 degrees Fahrenheit, and the great profusion of blooms produced in uninterrupted abundance for weeks will astonish and delight you. Flowers of the purest bright buttercup-yellow. Well grown plants have produced as high as seventy flower stems at one time, and over one thousand plants in one season. The flowers, and frequently the leaves, fold up at night and open again the next morning; but when grown in a partially shaded situation the flowers remain open all the time. Properly treated, the plants will flower in six weeks from the time the bulbs are planted. We do not claim the Bermuda Buttercup Oxalis to be a strictly new plant, but a greatly improved selection from Oxalis Cernua, grown in the congenial soil and climate of Bermuda until the bulbs have attained great strength, producing bulbs, plants and flowers larger and more luxuriant in all parts than the type. Excels all bulbous plants in profusion of bloom. It is graceful, and delights all who see it. **Price, 3 cents each; 30 cents per dozen.**

Oxalis

These varieties of Oxalis are all for winter blooming. They make the most beautiful hanging pots and baskets, producing a mass of flowers all winter, which in brilliant and beautiful colors are truly charming. Winter-blooming Oxalis are always sure to please. Plant five or six bulbs in a six-inch pot. They commence growth immediately after planting. Our mixture embraces pink, white, yellow, red, etc. **Price for mixture of all colors, 15 cents per dozen.**

Amaryllis Johnsonii

Lovely bulbous plants for winter or early spring blooming. Give plenty of water while growing. When through blooming, gradually withhold water, so that they may become dormant during the summer. Start again in the fall by repotting in fresh soil and increasing the supply of water gradually. This is the large crimson variety that is very popular. Immense Lily-like flowers of deep crimson, borne on strong stalks of from five to eight flowers. Very desirable. **Fine bulbs, 40 cents each.**

Milk and Wine Lily

Crinum Fimbriatum.

"I must tell you that Milk and Wine Lily has done famous work. It has developed nine fine blooms, and there are two unopened buds. We, therefore, gave it a free ride last Wednesday to our chapel services. It was admired by everybody. There were Bostonians and people from various towns to admire and enjoy it."—Mrs. E. Adams, Mass.

A grand sort. The most beautiful of the Crinums. Its bulbs grow large, and its strong-growing foliage is erect and sword-shaped; flowers in umbels, very large and showy, three to four inches in diameter, striped with white and carmine, and very fragrant. Hardy in the South. **Fine bulbs, 25 cents each.**

Fairy or Rain Lily Zephyranthes

Narrow Amaryllis-like foliage with long stemmed fairy-like delicate pink flowers; bloom almost continuously throughout the summer. A dozen bulbs in a pot or pan make a handsome ornament for the porch. **Price, 5 cents each; six for 25 cents; twelve for 45 cents.**

Calla Lilies

Everybody Needs a Calla for Winter Blooming. Here Are the Best.

THE DWARF CALLA (Little Gem) (Nana Compacta)—Grows ten to fifteen inches high, and produces many blooms. **Price, 20 cents each.**

CALLA ETHIOPICA—The old-fashioned sort; in three sizes. **Small bulbs that will bloom, 10 cents each; large bulbs, 25 cents each; extra large bulbs, 50 cents each.**

THE GODFREY CALLA LILY, "Devoniensis"—Undoubtedly the finest thing ever sent out in the Calla line, and quite indispensable. Blooms all winter. Compared with the ordinary Calla, it gives three blooms to one; it is snow-white and perfect in form. Blooms on very small plants, though it attains to a very large size with very large flowers. The new Godfrey Calla Devoniensis is a wonder. **Blooming bulbs, 25 cents each.**

GOLDEN YELLOW CALLA (Richardia Elliottiana)—Entirely distinct and unlike all other forms of yellow Calla; it has the same habit of growth as the ordinary white variety, with flowers of same size and shape, but of a rich, clear, lustrous golden-yellow color; the foliage is dark green with a number of translucent creamy-white spots, which add much to its beauty. It is but a few years ago that this sold at a very high price. We are now able to offer strong, blooming bulbs; **at 20 cents each, three for 50 cents.**

BLACK CALLA (Arum Sanctum)—This is the famous Black Calla; it grows so very easily and produces Calla Lily shaped flowers that in color are coal black. This Lily produces the blackest flower of any plant in existence. It is simply jet black; stock is scarce. **Price, 25 cents each; two for 40 cents.**

SPECIAL OFFER—The five Callas, costing \$1.00, for only 85 cents.

Splendid Peonies—Hardy Everywhere

“ARISTOCRAT OF FLOWERS”

The wonderful improvement made during recent years in these old-fashioned hardy plants has brought them into renewed popularity. The gorgeous flowers, which rival the finest Roses in size, form and color, are produced in great abundance. After once being planted they require little care and attention, thrive anywhere, and are absolutely hardy even in the coldest climates; each year after planting they grow into greater value, producing more and more flowers. They are not troubled with insect pests. Try some of our fine Peonies, and see what grand flowers they are. Get it out of your head that there are only Red, White and Pink Peonies to illustrate at flowering time. People who visit our field will say, "I have Pink and White Peonies. I desire only Red ones," but when they are shown the Pink and White, they invariably exclaim, "How grand! I have none like them." There is as much difference in Peonies as there is in Roses.

Hardy Perennial Phlox

This is one of the most easily grown hardy perennials, and the large number of beautiful varieties now offered make it especially desirable. These noble flowers are not only beautiful as individuals, but the cheerful appearance of our gardens during the summer and autumn months is much indebted to them. They succeed in any position or soil, and can be used to advantage either as single specimens in the mixed border or as large clumps or beds on the lawn. To produce the best results, however, they should have a rich, deep and rather moist soil, and let each clump have a space of from two to three feet in which to develop. They will continue to thrive for several years with little attention, as is attested by the fine clumps about old homesteads. The ease with which they are cultivated, their entire hardiness and the extended time of blooming, combined with the varied and beautiful coloring, make them especially valuable for garden planting. The Perennial Phlox usually commence to bloom in early summer, and are brilliant with color until after several frosts have come. They are admirably adapted for cemetery planting, also for a low hedge or screen to hide old fences and unsightly objects. Do not fail to plant Phlox in the fall, any time from September until the ground is frozen.

Price, 10 cents each; six for 50 cents. The Entire Set of Thirty-one Distinct Standard Varieties of Hardy Phlox for \$2.25.

BEAUTIFUL HOUSE FERNS

To Cheer Your Home During Winter

There are no plants grown that are more desirable for the house than the following fine decorative Ferns. They are easily grown, free from insects and disease, and thrive well in the ordinary temperature of the living room. See that the plants have plenty of drainage and are kept well watered; never let dry out for any length of time. Every one of these *Nephrolepis* Ferns is entirely distinct in every way. That we are headquarters for Ferns is evidenced by the choice assortment that we offer. No other firm offers so many distinct and choice varieties. Try us for Ferns.

THE "WANNAMAKER FERN," *Nephrolepis John Wannamaker*—A new Fern of wonderful beauty. Long, narrow, gracefully drooping fronds. It is not so compact as Scholzei, and, therefore, is a very airy and graceful Fern, and very durable in the house. A rapid grower; quite distinct from other ferns. **Fine young plants, 25 cents; strong plants, 75 cents.**

THE "BIG FOUR FERN," *Nephrolepis Splendida*—This is the most wonderful Fern of them all; it originated with G. & R., and is now offered for the first time. It combines the good qualities of the four most popular sorts. It has the grace of a "Boston," the wavy effect of a "Roosevelt," the fluffy effect of an "Ostrich Plume," and the uniqueness of a "Fish Tail." Some fronds will be straight "Boston," others will be true "Roosevelt," in others the ends of the pinnae will be the feathery "Ostrich Plume," while in others the ends of the pinnae will be the genuine "Fish Tail." Then again some fronds will have in a marked degree all of these desirable traits, forming a combination without parallel among Ferns. It well deserves the name of "Big Four Fern." Everyone who sees it goes "daffy" about it. This is without question the most splendid of all the *Nephrolepis*. Be sure and try it. **Fine young plants, 15 cents; strong plants, 50 cents.**

THE "PHILADELPHIA LACE FERN," *Nephrolepis Elegantissima*—The small size pinnae, or leaflets, are subdivided into perfect miniature fronds; the side pinnae stand at right angles to the midrib of the fronds, on edge instead of flat, giving both sides of the main frond the same beautiful appearance. It is impossible to conceive of the beauty and grace of this wonderful Fern from description. **Fine young plants, 15 cents; strong plants, 50 cents.**

"Teddy Junior" Fern.

THE "TEDDY JUNIOR FERN," *Nephrolepis Teddy Junior*—"Teddy Junior," the Fern for every household. This grand Fern was introduced recently by G. & R. The fronds are broad and beautifully tapered from base to tip; they droop just enough to make a shapely, graceful plant, permitting it to finish with a fine full center and perfect symmetrical spread. The pinnae are distinctly undulated, giving the fronds an attractive wavy appearance, which adds materially to their charming decorative effect. "Teddy Junior" will produce about four times more fronds than any other Fern ever introduced, finishing with fifty to sixty fronds in a four-inch pot. **Fine young plants, 15 cents; strong plants, 50 cents.**

Fronds of the "Roosevelt Fern."

THE "ROOSEVELT FERN," *Nephrolepis Roosevelt*—It is our good fortune and great pleasure to offer this wonderful new Fern, having introduced it in 1910. In this short time it stands second in popularity of all the Ferns, and will soon be more popular than even the old favorite Boston Fern. In general characteristics it resembles the world-famous Boston Fern, but it will sweep that Fern from the boards for two reasons; it produces many more fronds than the Boston, thus making a bushier, handsomer plant; then the pinnae are beautifully undulated, giving the "Roosevelt" a pronounced wavy effect seen in no other Fern; as the plant ages this effect becomes quite distinct. A charming and most notable variety. **Fine young plants, 20 cents; strong plants, 65 cents.**

THE "GOLD MEDAL FERN," *Nephrolepis Piersonii*—This Fern received a gold medal from the Society of American Florists and Ornamental Horticulturists, and is the only gold medal ever awarded by them for any plant whatsoever. An entirely new form of the Boston Fern. The pinnae subdivide, making miniature fronds which are superimposed on the main fronds, looking as if two or even three were condensed into one, giving the plant a graceful, feathery and plummy effect. **Fine young plants, 15 cents; strong plants, 50 cents.**

THE "CRESTED FERN," *Nephrolepis Scholzei*—The fronds are crested and stand erect, with a graceful arch, forming a plant of ideal shape, and they never break down, giving the plant a ragged appearance, as is so often the case with other plumed forms; furthermore, the loose, elegant arrangement of the fronds, allowing a free circulation of air through the foliage, prevents the center of even the largest specimen from becoming defective or yellow. The smallest salable plants perfectly express the type, and in every size are models of beauty for table decorations. **Fine young plants 15 cents; large plants, 50 cents.**

THE "OSTRICH PLUME FERN," *Nephrolepis Whitmanii*—A great Fern. In fact, it is a plant that appeals to everyone, and on that account will prove a much more valuable and profitable plant than other Ferns of this class. Everyone who has seen it is charmed with it. As someone has expressed it, "There is nothing like the Ostrich Plume Fern in cultivation. In decorative effect it so far outdistances the original variety that there is positively no comparison to be made. We consider it the most valuable novelty that has been introduced in many, many years." It has taken gold medals wherever shown. Fine young plants, 20 cents; strong plants, 65 cents.

THE "NEWPORT FERN," *Nephrolepis Scotti*—Of much dwarfier and bushier growth than the Boston Fern. The fronds droop gracefully, and are not as long and heavy as the Boston. It is a rapid grower, and to see it in all stages of growth from a runner in the bench to a fourteen-inch pot specimen will convince you that it will be in great demand as a house Fern. This has always been a favorite variety. Fine young plants, 15 cents; strong plants, 50 cents.

THE "FLUFFY RUFFLES FERN," *Nephrolepis Superbissima*—This new Fern is quite different from all other Ferns. Its distinguishing characteristics are its dark green foliage, darker than any other Fern, its dense growth, much more compact, and its irregular shaped fronds, which give it the name of "Fluffy Ruffles Fern." The fronds are very heavily imbricated, the pinnae overlapping, and are so formed as to resemble miniature Ferns, giving it the appearance of a Fern within a Fern. The plant is very sturdy in its habit and the fronds firm and rigid, never break down, so that it will stand more knocking around than any other Fern. Fine young plants, 25 cents; strong plants, 75 cents.

THE "FISH TAIL FERN," *Nephrolepis Davallioides Furcans*—This is a grand Fern entirely distinct from any of the other varieties of *Nephrolepis*. Throughout the South and especially at New Orleans this Fern takes precedence over all others. The ends of the pinnae are so formed as to resemble a fish tail, giving the fronds a crested appearance, very effective. It grows into the most shapely plant of any of the *Nephrolepis*. Grand for house culture. Fine young plants, 20 cents; strong plants, 65 cents.

THE "BABY'S BREATH FERN," *Nephrolepis Goodii*—This has the finest foliage of all the Ferns. It is so delicate that a lady on seeing it exclaimed, "Call it the Baby's Breath Fern, as it is so dainty in texture that a baby's breath would set its fluffy foliage in motion." The fronds are very fine and filmy, on which account it has been called by some the Lace Fern. It is an improved variety and the best of its type. Nothing is daintier or more exquisite than well-grown specimens in any size. Our reputation for it that no Fern in existence can compare with "Baby's Breath" in fluffiness. Fine young plants, 20 cents; strong plants, 65 cents.

THE "BOSTON FERN," *Nephrolepis Bostoniensis*—In the vicinity of Boston, no other plant is so extensively used as this graceful *Nephrolepis*, which differs from the ordinary Sword Fern in having much longer fronds, which frequently attain a length of six feet. These arch and droop over very gracefully, on account of which it is frequently called the Fountain Fern. This drooping habit makes it an excellent plant to grow as a single specimen on a table or pedestal. This Fern should not be compared with the Ostrich Plume Fern, as they are of an entirely different growth; both have their place and both are beautiful and desirable. Fine young plants, 20 cents; strong plants, 65 cents.

THE "PARLOR FERN," *Nephrolepis Whitmanii Compacta*—This is a condensed form of the "Ostrich Plume" Fern, with valuable characteristics added which are not evident in the parent, the pinnae subdividing, making miniature fronds, which are superimposed on the main fronds, looking as if two or more were condensed into one. Graceful beyond description. Fine young plants, 15 cents; strong plants, 50 cents.

THE "OLD ORIGINAL SWORD FERN," *Nephrolepis Exaltata*—This is the "old original Sword Fern," the "daddy" of them all, the one plant from which all the *Nephrolepis* we offer sprang. It is entirely different from any of its progeny, having narrow fronds that are long and of very erect growth. For this reason it is more largely used as a centerpiece in vases than are any of its descendants. Fine young plants, 15 cents; strong plants, 50 cents.

Special Offer:

The Fifteen Beautiful Ferns as named, costing \$2.70, for \$2.25. The Fifteen Ferns in strong plants, costing \$8.75, for \$8.00.

S. 35 cents; two-year plants, 60 cents.

CHEERFUL (H. T.)—Pure orange-flame, the flame tints overspreading the petals, giving it a wonderful and pleasing effect. Together with the distinct orange-yellow base, creates a combination of color hitherto unknown in Roses. The blooms are very large and full, of perfect shape and form, with enormous petals. It flowers freely and continuously all season. Superb. 35 cents; two-year plants, 60 cents.

CHERRY PAGE (H. T.)—Brilliant carmine-pink, suffused with golden-yellow at base of petals; flowers very large, with very shapely buds. Growth vigorous; very free-flowering. Extra. 25 cents; two-year plants, 50 cents.

CHRISIE MACKELLAR (H. T.)—A gorgeously beautiful Rose, combining in charming combination the following tones, tints and colors: Crimson-carmine, deep rich ochrey-madder, becoming a delicate but bright orangey-pink as the flower develops. It is one of the most delightfully color-toned Roses we have had the pleasure of seeing. It is strongly and deliciously pure primrose-tea scented. 20 cents; two-year plants, 50 cents.

COLLEEN (H. T.)—Brilliant rose, shaded rose-pink with deeper rose-crimson veneering and distinct creamy-yellow ground, never fading until the petals drop. The flower is quite full, with enormous petals and high pointed center, forming the noblest and most remarkable flower among Roses. Very free-blooming and smooth. Gold medal Rose of the National Rose Society of England, 1913. 25 cents; two-year plants, 60 cents.

COUNTESS CLANWILLIAM (H. T.)—Flowers very large and full, produced in endless abundance; buds long and pointed, opening to large, full, high centered flowers of great beauty and refinement. Color delicate peach-pink at the base of the petals, which are flamed and heavily edged with deep cherry-red, a beautiful contrast of color. A charming Rose. Gold medal, N. R. S. 35 cents; two-year plants, 65 cents.

CRIMSON QUEEN (H. T.)—A very strong, upright grower, flower large and full. Color a rich bright velvety crimson. A grand garden Rose, as it is always in bloom. 25 cents; two-year plants, 60 cents.

EDGAR M. BURNETT (H. T.)—Very large, full flowers of fine shape and form, with large flesh petals tinted rose. Said to be a great improvement on La France, and may be regarded as an advance on the type of Lady Alice Stanley; undoubtedly the sweetest scented Rose in existence. As a garden Rose unequaled. 35 cents; two-year plants, 65 cents.

FLORENCE FORRESTER (H. T.)—Clear snow-white with a lemon tinge; as the flowers age they become a pure white; the blooms are even larger than Paul Neyron. Its habit is absolutely perfect, and the freedom with which it flowers is marvelous. We consider this Rose the grandest of all whites for bedding. For size and substance has no equal among Hybrid Teas. Is very sweetly perfumed. Gold medal, National Rose Society. 25 cents; two-year plants, 50 cents.

FRANCIS SCOTT KEY (H. T.)—It is very fitting that such a fine new Rose should be honored with the name of the author of the "Star Spangled Banner," and also that it should hail from Baltimore, one of whose forts was being assailed when the inspiration came to the author to write our national anthem. The flowers are from large to very large, with sixty or more petals opening to a high center. The color is a magnificent deep red rose. Wherever it has been staged this Rose has swept all competitors from the boards and secured every prize it has entered for. Grand for the garden. 20 cents; two-year plants, 40c.

GORGEOUS (H. T.)—Flowers large and full, exquisitely formed and produced in endless profusion. Deep orange-yellow and heavily veined with reddish copper, the most charming and gorgeous coloring which has yet been introduced. The most striking Rose in existence. Gold medal, N. R. S. 35 cents; two-year plants, 65 cents.

Color, deep sulphur-yellow, passing to a lighter shade at the edges of the petals. Awarded a gold medal by the National Rose Society of England. This Rose is difficult to propagate, and will always, for this reason, remain high in price, although when once rooted and established, is a good grower. 35 cents; two-year plants, 75 cents.

HOOSIER BEAUTY—This is the new red Rose sent out from Indiana. It has a texture like velvet, in color glowing crimson-scarlet, with darker shadings, quite dazzling in its velvety brilliance. 20 cents; two-year plants, 40 cents.

IRISH FIRE FLAME (H. T.)—One of Alex. Dickson's Roses that is a good garden Rose. It makes beautiful buds that remain in shape a long time, having great substance. It comes with long stems, and with its unique color, it forms a combination that at once places it in the front rank of Roses for cut flowers. The color is old gold or coppery-yellow, flamed with ruddy-crimson. Certainly a most glorious Rose. **15 cents; two-year plants, 40 cents.**

New and Choice for Outdoor Planting or House Culture

Price, 12 cents each; any five of your own selection for 50 cents; any twelve for \$1.00. If you leave the selection of the varieties to us, we will send six for 50 cents, or thirteen for \$1.00. Large two-year-old Roses from this list, 30 cents each, or four for \$1.00.

For general planting, more especially in open ground, this class excels all others. One-year-old plants, such as we send by mail, bloom the first and each succeeding year from early spring until severe frosts. Two-year-old plants, of course, yield a greater profusion of flowers, owing to their size. The flowers are noted for their exquisite coloring and delightful fragrance; hardy everywhere in open ground with protection of litter, leaves, evergreen boughs or similar materials. Plant liberally of one-year-old Roses; the harvest of bloom they give the first year compensates for the trifling outlay. Anyone can succeed with them.

ANTOINE RIVOIRE—This is the famous Mrs. Taft Rose of the fashionable Eastern markets. This Rose is in a class by itself; no Rose ever produced has such substance of petal; color creamy-white with rainbow tints; a beauty and a wonder.
BESSIE BROWN—A Rose of transcendent beauty; of the largest size; color pearl-white with a delicate tinge of fawn.
ETOILE DE FRANCE—For the best red garden Rose it lies between this one, Rhea Reid and Helen Gould. Some say one and some say the other.
ETOILE DE LYON—Still the best large golden-yellow Rose.
HELEN GOOD (The Beauty Cochet)—What the introducers say: "This is a true Cochet Rose, and after two years' trial in the garden we pronounce it as good if not better than any Rose for the garden ever sent out. We bought the entire stock of this Rose, paying \$1,000 for two plants, this being by far the highest recorded price ever paid for any Rose. The color is a delicate yellow, suffused with pink, each petal edged deeper, very chaste and beautiful. The color, with its immense size and exquisite form, makes it without question the greatest Tea Rose ever introduced, and we are proud to have brought it out."
HELEN GOULD—A rich red Rose that is a great bloomer; the shade of red has been described best as a watermelon-red; elegant.
KAISERIN AUGUSTA VICTORIA—A grand white garden Rose that has stood the test of time. Full and double; fine buds and flowers.
LA FRANCE—This is claimed by many to be the queen of all the Roses; bright silvery-pink.

MAMAN COCHET (The Queen of all Garden Roses)—Such beauty and exquisite form as is possessed by this variety is well-nigh marvelous, and cannot be seen in any other Rose we know of. The buds are beautiful, large, full and firm and elegantly pointed; as they expand they show great depth and richness, sometimes measuring two and a half inches from base to tip. Flowers superb when open, extra large, perfectly double and of splendid substance. Small pot plants will in the open ground quickly make large, strong bushes and produce, on long, stiff stems, great numbers of perfect flowers that are enchanting in fragrance and delicate brightness. The color is rich, clear pink, changing to a silvery-rose. As we see it, one good Rose like any of the Cochet Roses is worth a whole collection of poor ones.
SOUVENIR DE PRES. CARNOT—A grand Rose of the largest size; the color a delicate fawn or salmon; extra fine.
WHITE MAMAN COCHET (No Finer Rose Than This)—This Rose attracted our attention from the very first time we ever saw it in flower. It is of the largest size, and as you will notice, the flower is built up, or rounded, and very double. The color is a pure snow-white. Sometimes outdoors it is tinged pink, which only adds to its great beauty. No Rose surpasses it in vigorous growth and in the immense size of its buds and flowers—indeed, nothing in the Tea family approaches it in size. Deliciously fragrant.

WM. R. SMITH—This Rose has several names, such as Charles Dingee, Jeanette Heller, Maiden's Blush, etc. Color delicate blush. It has no superior as a garden Rose.

Polyantha, or Baby Rambler Roses

A class of miniature Roses derived from the Climbing Polyantha. They are of dwarf habit and bloom so freely as to cover the entire plant with bloom all through summer and fall. The plants are splendid for bedding, or as edgings for borders they are hardy. Let us tell you something about these miniature Roses. While Europe has appreciated these Roses for years, America is just beginning to wake up to the fact that they have come to stay. They are useful, either pot grown or for bedding purposes or for hedge effect.

Price, 12 cents each; five for 50 cents; two-year plants, 40 cents each; three for \$1.00.

It always was a popular outdoor Rose on the Pacific Coast, but recently even in the effete East and everywhere in America they are planting it simply by thousands for cut flowers. It has

become quite the rage. It makes a handsome miniature Rose, coming in sprays of three to five buds, and combines in beautiful effect with so many other flowers in all kinds of floral work. It is a very prolific bloomer and if carefully protected in the winter should be a money-maker, both outdoors and under glass. The bud and flower are both handsome. Color bluish, shaded light salmon-pink; distinct and desirable.

It is a bush form of the "Climbing Tausendschoen," or "Thousand Beauties," having all the charm in the variable coloring in its flowers that its parent has, being firm white, delicately flushed pink, changing to deep rosy-carmine. Will prove a very popular corsage variety; is grown in quantity now for this purpose. 15 cents; two-year plants, 40 cents.

MAMAN TURBAT—Branching growth, large, full flowers, produced in large panicles of twenty to thirty flowers. Color clear peach-pink, one of the best in this section. 15 cents.

ORLEANS—The showiest and prettiest of all the Baby Ramblers. This charming and dainty Rose is of beautiful rounded habit and is a huge bouquet of deep cerise or Geranium-pink, with distinct showy center of pure white; florets not crowded, but of beautiful arrangement, making as a whole a charming combination that cannot be beaten. The color is irresistible. The plant grows like a weed and the flowers are nearly "immortelle" in their lasting qualities. We believe that they will outlast almost any other Rose in existence with their stiff paper-like texture. This pretty Rose has taken Europe by storm and is making a sensation in this country. Awarded gold medal. 15 cents; two-year plants, 40 cents.

TIP TOP ("Baby Doll")—This delightful little "Sweetheart" Rose is a wonder. The color is absolutely new, and quite startling in its brilliancy, golden-yellow tipped with clear, bright cerise. The foliage is narrow, long and sharply pointed, a deep glossy green—a very beautiful setting for the lovely little doll-roses, a bench of "Baby Doll" being an even parterre of delicious color. 25 cents.

The New Hardy Climbing Roses

AMERICAN PILLAR—A single flowering variety of great beauty, which appeals to everyone. The flowers are of enormous size, three to four inches across, of a lovely shade of apple-blossom pink, with a clear white eye and cluster of yellow stamens. These flowers are borne in immense bunches. They last in perfection a long time, and are followed by brilliant red hips of berries, which are carried late into the winter; and as the plant frequently retains its lovely green foliage until the end of November, it forms a beautiful decorative subject throughout the autumn months. **20 cents; two-year plants, 50 cents.**

BRAISWICK CHARM—For arches, pergolas, or for screens this variety is undoubtedly foremost. Deep orange-yellow bud shading almost to white on the outer petals as the flower expands. The nearest approach to the perpetual flowering Wichuraiana. **35 cents; two-year plants, 75 cents.**

CHRISTINE WRIGHT, or PINK CLIMBING AMERICAN BEAUTY—This is identical with the Red Climbing American Beauty described next below this variety; flowers four inches in diameter; color bright, clear pink; immense. Try it; a fine companion for Climbing American Beauty. **20 cents; two-year plants, 50 cents.**

CLIMBING AMERICAN BEAUTY—Same color, size and fragrance as American Beauty, with the addition of the climbing habit. Good foliage and better blooming qualities. One plant of this new Rose will produce twenty times as many flowers in June as the old American Beauty, besides blooming occasionally during the summer. Blooms three to four inches across; has proved perfectly hardy and stands heat and drought as well as any Rose in our collection. **20 cents; two-year plants, 50 cents.**

GARDENIA (The Hardy Marechal Niel)—This grand Rose has proven itself hardy in Virginia and Tennessee. It is a deep golden-yellow of the largest size. **25 cents; two-year plants, 50 cents.**

GEISHA—Brilliant scarlet-crimson. The long shoots are completely covered with bloom the entire length. A wonderfully pretty Rose. **35 cents; two-year plants, 65 cents.**

LE MEXIQUE—Delicate silvery-rose, turning to rosy-white, reverse of petals light rose. Large for its class. Flowers full, opening well, produced in clusters. Continuous and perpetual flowering. **20 cents; two-year plants, 50 cents.**

ORIFLAME—Bright vivid rose, suffused with coppery-gold borne in bunches of numerous flowers with bold, fountain-like sprays. Extra. **35 cents; two-year plants, 65 cents.**

RED DOROTHY PERKINS, or EXCELSA—It is a good deal to claim for a Rose, but we are within bounds when we describe Excelsa as a brilliant Crimson Rambler flower on glossy, varnished Wichuraiana foliage. The defects of Crimson Rambler are its unsightly foliage in unseasonable weather, and its defoliation by insects; the infusion of Wichuraiana blood assures an ornamental climber which is nearly evergreen, and this will assure this lovely crimson-scarlet pillar Rose a place in every American garden, for it is quite hardy in addition to all its other fine points. The flowers are very double, produced in large trusses of thirty to forty, and almost every eye on a shoot produces large clusters of flowers. The color is intense crimson-maroon, the tips of the petals tinged with scarlet. The finest of all red climbing Roses. **20c; two-year plants, 50c.**

SHOWER OF GOLD—This variety produces masses of flowers in large clusters. The color is a deep golden-yellow, with orange shadings in the center. Enormous lateral branches are produced, which are densely clad with glossy green foliage that resists disease. This fills the "long felt want" for a hardy yellow climbing Rose. **25 cents; two-year plants, 50 cents.**

SILVER MOON—Flowers very large, four and one-half inches and over in diameter. Pure white in color; petals of great substance, beautifully cupped, forming a clematis-like flower. The large bunch of yellow stamens in the center adds to its attractiveness. These flowers are borne on strong stems twelve to eighteen inches long, and are delicately scented. The plant is a strong grower, with large, glossy, bronze-green foliage. **25 cents; two-year plants, 50 cents.**

SOURCE DE OR—A most beautiful variety. Large for its class. Full flowers. Color golden-yellow. A great acquisition, producing large panicles of flowers. A decided beauty. **25 cents; two-year plants, 50 cents.**

SWEET LAVENDER—Bright pale mauve or lavender, with golden stamens. Most distinct. Dense, dark green foliage and many large bunches of flowers. Very vigorous. **25 cents; two-year plants, 50 cents.**

Tausendschoen, or Thousand Beauties.

TAUSENDSCHOEN, or THOUSAND BEAUTIES—A climbing Rose that comes to us from Germany. The flowers upon first opening are the most delicate shade of pink ever seen in a Rose, might be described as a white delicately flushed pink, changing to rosy-carmine. It gets its name from its many flowers and the variation in coloring. This Rose is sweeping the country like a prairie fire. **20 cents; two-year plants, 50 cents.**

VEILCHENBLAU (The Wonderful New Blue Rose)—This is a Rambler, and will thrive anywhere, being perfectly hardy. It has created a great stir in the Rose world, for the talk of a Blue Rose has been going on since time immemorial. It first opens a pink color, quickly changing to a decided violet-blue. When the plant is in full bloom it presents a startling effect. **20 cents each; two-year plants, 50 cents.**

as well as the trusses being very large; one of the easiest to force. Early.
